How does digital transformation succeed?

The results of the Lünendonk® study "Business Innovation & Transformation - Where do companies stand today?" show that end-to-end solutions have become increasingly important.

Kiel – Specialist processes are increasingly digitized and automated. Artificial intelligence (AI) is gaining market maturity. In order not to lose sight of factors such as governance, compliance and security, companies need enhanced advice on business solutions from IT service providers. First and foremost, technical and industry expertise in big data and analytics is in demand, but in order to secure investments in digitalization, end-to-end solutions are becoming increasingly important for companies.

These keyfindings confirm Consist's approach of needs-based consulting before the implementation of big data projects. The detailed results of the current study can be found at www.consist.de/de/news/Wie-gelingt-digitale-Transformation/.

Company Portrait

Consist Software Solutions GmbH is a specialist in IT services and software. The IT service provider supports its customers throughout the entire software lifecycle, from development projects to maintenance in the operating phase, to supplementary big data and security products.

With more than 190 employees at the sites in Kiel, Berlin and Frankfurt, Consist is setting the benchmark for data analytics, IT security and managed services.

Founded in 1994 at the Kiel headquarters, the company continues its growth path, which makes Consist one of the most experienced IT service providers, thanks to proven mainframe competence and highly qualified specialists for innovative technologies. Awarded with the „Großer Preis des Mittelstandes“ Consist again received the plaque of honor in 2016.

IT that works.
